**AMENDMENTS****In The Specification**

Please replace the fourth paragraph (beginning at line 18) of page 5 with the following:

An image retrieval system performs both keyword-based and content-based image retrieval. A user interface allows a user to specify a query using a combination of keywords and example images. Depending on the input query, the image retrieval system finds images with keywords that match the keywords in the query and/or images with similar low-level features, such as color, texture, and shape. The system ranks the images and returns them to the user.
